## **DETAILED ACTION**

## Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration believes the named inventor or inventors to be the original and first inventor or inventors of the subject matter which is claimed and for which a patent is sought.

It does not state that the person making the oath or declaration has reviewed and understands the contents of the specification, including the claims, as amended by any amendment specifically referred to in the oath or declaration.

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-6, 8-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 10/789,584

Art Unit: 2872

Regarding claims 3, 5, 6, 9, 11, 12, said claims recite "limited amount of radiations", which is indefinite. The scope of the above limitation is not clearly defined, and needs to be redefined with a greater degree of specificity.

Regarding claims 2, 4, 6, 8, 10, 12, said claims recite "a group of laser emissions the principal members of which", a phrase which is not clear. The examiner is unable to ascertain the meaning of 'principal members". It is not clear whether it means "the strongest of the group", "the plurality" or something else.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 1-12 refer to a "three-component, light-generating medium", which is "energize[d]...to a visible-light-generating condition" by being connected to a source of predetermined electric potential. Specifically, in one embodiment (corresponding to claims 1-6), said medium exhibits laser emission in three separate wavelength regions. In another embodiment (corresponding to claims 7-12), the medium exhibits light-emitting diode emission in the same three separate wavelength regions as above. The critical issue here is that all the claims are drawn to a *single medium* (emphasis added) that exhibits the above described laser

Application/Control Number: 10/789,584

Art Unit: 2872

emission behavior. However, nowhere in the specification is there mentioning or a description

Page 4

with any degree of specificity of the existence of such a medium. For example, there is no

disclosure whatsoever of the single laser medium or the single laser diode that can lase in the

three claimed wavelength regions, by applying the appropriate electric potential.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Dr. Leo Boutsikaris whose telephone number is 571-272-2308.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
